PRODUCT SAFETY & TESTING

On-Site Testing: Since 2007, Prime has had a full-time in-house testing lab. All incoming shipments at our warehouses are tested for consistency and compliance. A full-time safety and regulatory specialist is dedicated to ensuring that our products and printing inks meet all applicable requirements.

Third-Party Testing: In addition to our in-house testing, most Prime products and all our CPSIA-compliant decorating inks are tested annually at CPSC approved third-party laboratories.

California Proposition 65 (Prop 65): Prime Line's products meet all applicable federal safety requirements as enforced by the FDA, CPSC, and FCC. Products shipping to California are also subject to Proposition 65.

HUGE SAVINGS ON LARGE ORDERS

- Guarantee your inventory, enjoy more options for customization and save big when you order overseas with Source Abroad.
- Leverage the in-depth product line Prime has to offer or go “outside the box” with alternative items sourced through our trusted factories overseas.
- Fixed contacts offer guaranteed logistics planning with our freight carriers and help keep your orders on schedule.
- A talented team with members located in the US and China, ready to help with ideation and managing your orders.

DISTINCTIVE DECORATING

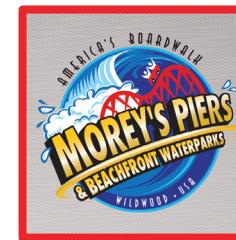

SILK SCREEN

The direct imprinting of a design or copy into the surface of a product. Image is pressed through tensioned nylon mesh, leaving a paint-like appearance. Sharper imprint than Pad Printing, though it requires a relatively flat surface without obstructions.

DEBOSS

A technique for leather and other substrates in which a metal die is created from artwork. The die is then heat-pressed into the material, leaving an image of the artwork in a recess creating a classic sophistication.

VIBRATECSM 4CP

Delivers high-resolution photo-quality images on a broad range of products. Make a bold statement. Artwork Requirement: (CMYK) Four-color process.

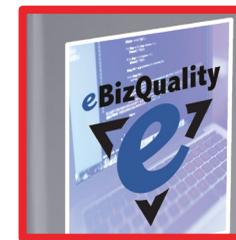

SPOT COLOR TRANSFER

Imprinting for detailed and multicolor imprints for better appearance on certain substrates. Holds registration on a wide range of surfaces such as: insulated padding, PVC, nylon, neoprene, ABS and more.

LASER ENGRAVE

A clean, polished appearance. Light burns away the surface to reveal the substrate. Works best when the item's surface is a different color from the substrate. A contrasting black imprint can be created with Laser Oxidation when the surface and the substrate are the same or similar color.

4CP TRANSFER

Enhance your message with our patented process which converts photo-quality images and graphics into a spectacular imprint. Artwork Requirement: (CMYK) Four-color process.

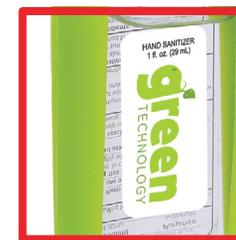

EMBROIDERY

A traditional method of decorating textiles with needle and colored thread. Available for select caps, apparel, bags, blankets, towels and aprons.

PAD PRINT

An inked image is transferred from a photo-etched plate to a thin, soft silicone pad, which is then pressed against the part. The pad can wrap itself as much as 180° around a small object, and ink coverage is excellent. One color is printed at a time and registration between colors can be tight – up to four colors.

4CP DIGITAL LABEL

Full-color graphics and photography available on a variety of products. Image can be encased by Lustredome™, a clear plastic epoxy dome or covering. Artwork Requirement: (CMYK) Four-color process.

Add power to your brand with the latest tech accessories, including chargers, wireless speakers and more.
