STYLE GUIDE TWENTY-TWO

# DEFIANTLY SUSTAINABLE\*

U.S. grown cotton uses less water to grow. Two-thirds of U.S. cotton is produced using only rainfall and no supplemental irrigation.\*

Over the past five years, our company has used recycled polyester amounting to the equivalent of 450 million plastic bottles, and now we're in the process of replacing all virgin polyester with recycled polyester.

By adding TENCEL™ to our modal tees, we can say it's stronger and more durable than most fibers, and it's made from plants—keeping it in the sustainable fiber family.

COMFORTABLE,  
RESPONSIBLE  
STYLE.
