FOR OVER 100 YEARS, WE'VE BEEN MAKING WORKWEAR -

the most essential tool on the job site. We know when it comes to hard-working gear, there are only three things that matter: Warmth, Durability, and Comfort. Our insulated items feature warmth options for every cold-weather degree, from arctic insulation to lightweight flannel lining. Triple-needle stitched main seams, heavy-duty brass zippers, and time-tested cotton duck canvas shells provide the durability needed to get the job done. Our standard pleated elbows and action-back provide the extra movement needed to make work comfortable.

Choose Berne - we are the workwear experts.

A low-angle photograph of a construction site. In the foreground, a white shower head is mounted on a vertical steel beam. To the left, a horizontal steel beam is being welded, with a shower of bright orange sparks flying downwards. The background shows a clear sky and more structural elements of the building under construction.

MEN'S COLLECTION

Workwear made tough for every season and any weather.
Constructed to keep you comfortable through demanding days,
and designed to hold up to tough tasks.

Comfort, made tough.

ICECAP COLLECTION

The Berne Icecap Collection features workwear built to withstand harsh, frigid conditions.

The heavyweight, waterproof, abrasion and wind resistant nylon shell offers maximum protection against the elements, while arctic-weight insulation delivers superior warmth.

Don't let sub-zero temperatures stand in your way. Block the cold and stay dry with Berne's warmest, most durable workwear to date.

A photograph of a field of green plants, possibly pumpkins or squash, with large, lobed leaves. In the background, there is a dense field of small yellow flowers. The lighting is warm and golden, suggesting late afternoon or early morning. A dark brown rectangular box is overlaid on the top right of the image, containing the word 'YOUTH' in white capital letters, followed by a thin blue horizontal line and a paragraph of text.

YOUTH

Durable enough for work or play. warm enough for low temperatures. We provide quality outerwear that holds up to daily chores, whether they are building snow forts or shoveling walkways, we've got kids covered.

FLAME RESISTANT

Our Flame Resistant line features gear at various certification levels that provide protection against clothing ignition and sustained flame spread. Built to last and certified for work.

NFPA 2112 and 70E SAFETY STANDARDS

NFPA 2112 and 70E are safety standards that help govern the oil and gas markets as well as the electrical utilities markets. An HRC level is determined by the minimum amount of calories per square centimeter (ATPV or Cal/CM²). Five risk levels exist which range from 0 to 4. Level 0 is little to no risk, whereas level 4 is an extreme risk.

HRC 2 Flame resistant clothing with required minimum arc rating 8 cal/cm².

HRC 3 Flame resistant clothing with required minimum arc rating 25 cal/cm².

HRC 4 Flame resistant clothing with required minimum arc rating 40 cal/cm².

ATPV Arc Thermal Performance Value (ATPV) is the incident energy on a material or multilayer system of material that results in a 50% probability that sufficient heat transfer through the tested specimen is predicted to cause the onset of a 2nd degree burn injury.

EBT Break-open Threshold Energy (EBT) is the incident energy on a material or multilayer system of material that results in a 50% probability of break-open.

CONCEALED CARRY WORKWEAR

The Berne Concealed Carry Workwear line features the U.S. Patented Adder System™.

Named after the world's fastest striking venomous snake, The Death Adder, The Adder System is an exterior weapon concealment system designed for speed, security and ultimate concealment on a wide variety of workwear including jackets, vests, and pants.

How does it work?

Covert

The exterior cargo pocket covering the concealed carry storage area is designed to look and function like a standard pocket.

Fast

The Adder System is designed for rapid, uninhibited access to your weapon system. Simply grab the pocket flap of the exterior cargo pocket and pull firmly, straight down to access the concealed carry storage area.

Versatile

The versatile concealed carry storage area provides you with the choice of several weapon systems allowing you to select the appropriate level of legal use of force when unavoidable.

Secure

The Adder System allows the secure use of a holster. The MOLLE Grid allows you to securely attach a holster for your weapons system. This means your weapon is stored in its place right where you need it, when you need it.
